

OBJECTIVE

Second-year Artificial Intelligence and Machine Learning engineering student with a strong foundation in Python, Java, and core machine learning concepts. Focused on building real-world AI-driven applications across healthcare, NLP, and predictive systems, while continuously improving technical and problem-solving skills.

SKILLS

- Programming Languages: Python, Java, C
- Libraries & Frameworks: NumPy, Pandas, Matplotlib
- Machine Learning: Supervised Learning, Convolutional Neural Networks (CNN), Natural Language Processing (NLP)
- Database: SQL
- Tools: Git

CERTIFICATIONS

- Supervised Machine Learning - Stanford & DeepLearning.AI (Coursera)
- Advanced Learning Algorithms - Stanford & DeepLearning.AI (Coursera)
- Unsupervised Learning, Recommenders, Reinforcement Learning - Stanford & DeepLearning.AI (Coursera)
- Machine Learning Specialization - Stanford & DeepLearning.AI (Coursera)

EDUCATION

- **Dr.Mahalingam College of Engineering and Technology**

Bachelor of Engineering in Artificial Intelligence and Machine Learning | 2024 - 2028
CGPA - 8.5

- **Bhaaratha Vidhya Bhavan Matric Higher Secondary School**

Higher Secondary Certificate
May 2024
Score - 91%

Secondary School Leaving Certificate
May 2022
Score - 89%

AREA OF INTEREST

- Machine Learning & Deep Learning
- Neural Networks & Computer Vision
- Full Stack Development for AI Applications

TECHNICAL EVENTS

- Participated in hackathons:
- Smart India Hackathon - 2025(Smart Tourist Safety System)
 - SHE-CODES-AI (MindGuard AI)
 - MEDICATHON (MedScan AI)
- Technical events:
- Dr. Mahalingam College (Slide Fest)
 - Kumaraguru College (Ideathon)
 - Jansons Institute (Coding Competition)

PROECTS

MindGuard AI
A predictive mental health assistant

- Collaborated with a 4-member team to build an AI mental-health monitoring platform using Next.js and FastAPI.
- Developed an LLM-based chatbot with emotion classification to detect stress signals and recommend personalized coping strategies.
- Implemented real-time emotional analytics using Supabase and automated crisis-response workflows with n8n.

ResumeScore AI
A resume matcher with score projector

- Built ResumeScore AI, an NLP-based web application that evaluates resume-job description similarity using transformer embeddings and cosine similarity, enabling automated candidate screening.

RoleGenie AI
A project role assisting assistant

- Designed and implemented a machine learning-driven decision support system for team role allocation, incorporating multi-class classification (MLP), team composition analysis, and a real-time Streamlit interface with advisory feedback
